## WELCOME 1955-57 CLASSIC CHEVY OWNERS!

You now have the world's largest supply of 1955-57 Classic Chevy parts and accessories at your fingertips, as well as a team of enthusiasts and experts at your disposal who can offer technical assistance and practical advice pertaining to your particular car. We sincerely appreciate your business, and look forward to working with you on your classic 55-57 Tri-Five Chevrolet!

## LOWEST PRICE GUARANTEE

Eckler's Guarantee is simple: You always get the best quality parts at the lowest price! Show us the identical item advertised in any current magazine, catalog, or website and we'll match our competitor's current price, guaranteed! This offer is available only at the time of purchase and applies to in-stock merchandise only. We can't combine this with any other offer. Tires, restoration services, kits, window glass, cores, reproduction batteries, certain engines, transmissions, used parts, special order parts, and shipping and handling charges are excluded.

## BEST PARTS, BEST PRICE

This is not just a slogan! Eckler's is committed to providing the highest quality parts at the most competitive prices. We source and select all of our parts exclusively from the world's leading brand name manufacturers using our massive buying power. This means you get the best there is, at the best prices in the market today.

## 100% SATISFACTION GUARANTEED

Our commitment to you: If for any reason you are not 100% satisfied with any of our products, simply return them for a full refund, credit or exchange—your choice.

## SHIPPING AND HANDLING

Check [EcklersAutomotive.com](http://EcklersAutomotive.com) for current shipping and handling estimates. In the catalog,  denotes items that ship via truck, and  denotes oversized dimensions or weight, which incur additional charges.

## NEED IT FAST?

Have your order delivered within 1 or 2 business days by using Express Shipping! Express Shipping is limited to in-stock, non-oversized items weighing less than 20 pounds. Orders must be placed Monday-Friday before 1:00 p.m. EST. Please contact our sales team for rates.

## SAME-DAY PROCESSING

Standard U.S. order processing time for in-stock items is 24 hours. If you need your order processed the same day, call us Monday-Friday before 1:00 p.m. EST and request same-day processing. For a small charge we'll provide special processing of all in-stock parts the same day.

## GIFT CERTIFICATES

Perfect for when you just can't decide. Available in many different amounts from \$25 right up through \$1,000. Redeemable for any items we sell.

## PRICES

Eckler's is not responsible for pricing changes, errors, or omissions in this catalog or online. Prices are subject to change without notice.

## LIMITED WARRANTY

Eckler's will not be responsible for any damage or loss caused by delays, failures, consequential damage, labor, transportation, or any other charges incurred in the replacement or repair of a defective item. Eckler's is not responsible for any consequences resulting from the installation of any parts.

## EASY ORDERING!

We accept credit and debit cards, checks, and money orders, as well as first party, pre-printed checks from U.S. banks with your order. There will be a \$35 charge for all checks returned for insufficient funds.

## Flex-A-Lite 17" Steel Fan, 6-Blade, Clutch Type

- Replacement 17" Steel Fan Blade
- For Use With Clutch P/N 160752
- Will Not Work With Reverse Rotation Water Pumps

**NEW**

This universal fan blade is constructed like the original GM versions, and works with many standard clutches like our part number 160752. LT-1s from the 1990s had reverse rotation water pumps, and this blade will not work with those engines. This is a great option for most others though. As long as your motor mounts are unbroken there is ample clearance with fan shrouds with an inside diameter of 18" and larger.

## Race Pro

The Race Pro Muffler features a 'straight through' path that guarantees throughput at a level of 99% of straight tubing throughput. The Race Pro's aggressive sound is the result of applying a layer of stainless mesh around a unique internal perforated tube, accompanied by a healthy stuffing of rock wool before the unit is sealed. The welded case makes for a sturdy muffler that will not rattle. The stainless construction of our mufflers enables them to resist corrosion and extends the lifespan of the product, while their superior flow improves gas mileage. The 409 Stainless steel construction resists corrosion. The Race Pro muffler is not recommended on lower horsepower vehicles.

If you want to be noticed, Violators are your mufflers! Eckler's Violator exhaust systems are designed by Pypes Performance Exhaust to boost your car's performance to the next level--you'll get more power, better mileage, and a rich, throaty tone that cannot be ignored. The Violator flows as much air as our Race Pro muffler, but has an incredibly unique and aggressive sound. The Violator's sound is the result of an oversized 3.0" unique internal louvered tube with mini sound deflector chambers.

## Vintage Air Servo Operated Gen IV Air Conditioning Units

- The Best Cooling Available For Your Classic
- Separate Heating and Air Conditioning Coils
- Unit Uses All Electronic Servos, No Cables
- Works With Original Deluxe Heater Panel
- Use With Small Or Big Block V8

The Gen IV kit is the same as our other kits except with an improved heat/AC coil for better efficiency and is cable free. Operation of entire unit is via electronic servos. These servos control an advanced ECM module for maximum efficiency.

All of our Vintage Air systems use HFC-134A refrigerant. Please specify engine type, short or long water pump, alternator position and radiator position. Serpentine kits do not include compressor brackets, but a 7 groove compressor pulley is included.

## Griffin Aluminum Down-Flow Radiators

- Cools Down Even The Hottest Engines
- All Aluminum
- In-Line Construction For Best Air Flow

Our radiators are available in two series: Pro and HP. The Pro series features large 1" diameter cooling tubes for normal to moderate cooling needs. The HP series features 1-1/4" diameter tubes for greater cooling needs. V8 position radiators (flanges on radiator point to the front) mount behind the upper core support bar on stock V8 core supports. 6-cylinder position radiators (flanges on radiator point to the rear) mount in front of the upper core support bar on stock 6-cylinder core supports. These radiators bolt to a stock core support or CCI's tubular core support. Uses stock or aftermarket radiator cap.

## Alternators

- Replacement Parts
- Updates Your Charging System
- 70 Amps Output

*Original generators very often can't keep up with the addition of electronic accessories so common on today's classics. An alternator will upgrade your system and keep your battery fully charged. Use the internally regulated alternator if you wish to retain the stock indicator light. One-wire alternators will not operate the indicator light.*

## Hood Bars and Extensions

- Best Quality Reproduction Hood Bar
- Perfect For Custom Builds and Pro-Touring Cars
- Improved Design Narrows The Gap Between Hood and Fender On Original GM Moldings
- Includes Mounting Hardware
- Made In USA

*Original GM and GM style reproduction hood bar and extensions have additional clearance between the hood and fenders. Eckler's Classic Chevy has this improved design for custom cars that makes the molding gap appear more straight. The chrome is flawless as a e the castings. NOTE: Original GM hood bars and extensions had additional space between them from the factory giving them a "splayed" look. If you are looking for these items for judged competition, please see our P/Ns 57-130675, 57-130674, 57-168404, 57-130667, 57-190807, or 57-190806.*

## Rear Shock Bar Relocation Kit

- Relocates Rear Shocks To Prevent Trunk Floor Damage
- Improves Ride Quality
- Easy Bolt-On Installation

Perhaps the easiest, single most important modification you can make to your classic Chevy; the rear shock bar relocation kit. The original 1955-57 Chevys were poorly designed in this area. The rear shocks bolted directly to the trunk floor. This shock relocation kit moves the upper rear shock mount location down to the frame where Chevrolet should have put them! To install the shock bar, all that is required is drilling 4 holes in the frame and bolt it in. This rear shock bar relocation kit may be used with stock and replacement rear shocks; no special shock absorbers are required. It is 35-1/4" wide and is designed to be used with 1-piece frame cars with no weld seam down the bottom center of the frame rails. It will fit all passenger cars, wagons, Nomads and Sedan Deliverys. Instructions and hardware are included to make installation easy.

## Under Hood or Trunk Lid Pads, Quietride AcoustiHOOD™, 3-D Molded

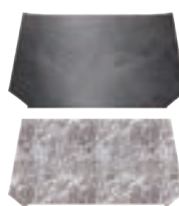

- Awesome Upgrade For Your Tri-Five Chevy!
- High Temperature ABS Plastic Molded To Fit Underside Of The Hood or Trunk Lid
- Includes Pre-Cut Heatshield Panels
- Available Molded Smooth For Restorations
- Choose Classic GM Logos For Resto-Mods, Boulevard Cruisers or Daily Drivers
- Mounting Pins and Illustrated Installation Instructions Included
- Some Steel Hoods And Deck Lids Might Require Additional Holes To Be Drilled
- Fiberglass Hoods And Deck Lids Will Use Magnetic Tabs For Installation

The underside of the hood and trunk lid has always been an eyesore in most Tri-fives until now! Our covers are manufactured to cover the structural ribs on the under side of the hood surface or deck lid to give a clean, finished look to the engine or trunk compartment. Smooth ABS plastic is 3-D molded for a super fit. Not looking for the smooth look? No Problem! Ecklers Classic Chevy has you covered with a plethora of different logos to make your Tri-Five all yours! NOTE: AcoustiHOOD panels can regularly tolerate heat up to 250 degrees. Please allow at least 1" of clearance between engine components such as the air cleaner.

*After decades of service, the windshield on your classic Chevy may have become cloudy or discolored in addition to suffering from wiper scratches, stone chips and cracks. Besides detracting from your Chevy's appearance, these defects in the windshield could dangerously obscure your vision and violate state clear vision laws. Now you can correct the problem with this replacement windshield that matches the factory dimensions for a perfect installation. It meets or exceeds Department of Transportation specifications for automotive use*

## 1955 Premium Quality Interior Kits for your 1955-57 Chevy!

At Eckler's Classic Chevy, we pride ourselves on offering you only the finest interior kits for your 55-57. We've taken great care to make sure every component meets or exceeds the exacting standards of original equipment, right down to the correct material weights and stitching patterns. In fact, our complete interior kits will not only help you win the trophies, they'll also make you feel like you just "took delivery" of your brand new Tri-Five!

### Seat Upholstery

All of our seat upholstery is manufactured using the correct grain materials and colors. We pay particular attention to the pleats, seams, stitching and piping, making sure everything is just the way Chevrolet produced it years ago!

## Door Panels

Our premium quality door panels leave no detail overlooked. Our panels offer factory correct grains and patterns, and are mounted to sturdy backing board that resists warping. Mylar sections and welts (where applicable) replicate the original accents perfectly.

## Molded Carpet

Since quality carpet is the foundation for any car's interior, we offer you only the finest available. Cut-Pile, weave or Loop, one or two-piece (depending on application), are manufactured in factory correct colors, molded for a perfect, easy fit — and include padding

## Important Interior Components

Headliners, sunvisors, kick panels, package trays, windlace, and convertible top boots are all reproduced to exacting factory correct specifications, using premium quality materials with correct grains, patterns, and colors. Your complete satisfaction is guaranteed with every Eckler's Interior Kit!

## Interior Package Kits

- Please Specify Color

Non-convertible kits include: seat covers, pre-assembled door and side panels, carpet, headliner, sunvisors, kick panels, package tray and windlace. Convertible kits include: seat covers, pre-assembled door and side panels, carpet, top boot, sunvisors, kick panels, and windlace. Interior side panel stainless is not included, must be purchased separately. Nomad and Wagon kits include the rear wheel well covers and cargo side boards, but not the cargo floor linoleum.

**Note:** For all 1955 Nomad and '56 Bel Air interior orders, you must send your cleaned front armrest bases to Eckler's Classic Chevy or purchase new bases along with your kit.

## Which One Should I Buy?

Use the handy guide below to help choose the right power steering system for your classic:

**1.** The overall best aftermarket steering system you can buy. Includes all items needed to complete the installation. This kit will give you better steering and road feel than any other system on the market.

Major Advantage: Best steering and road feel.

**2.** A good second choice to the rack and pinion. It retains the original steering linkage and pitman arm. Road feel is second only to rack and pinion.

Major Advantage: Less expensive and fewer modifications to car required.

**3.** Major Advantage: Same as #2 above.

**4.** Same as item #1 but does not include the steering pump, pump bracket or pulleys (you must supply).

Major Advantage: Best steering and road feel.

**5.** For use with factory power steering cars. Eliminates the stock generator driven pump.

Major Advantage: Eliminates leaky original pump, allows conversion to alternator.

**6.** Most closely duplicates the original power-assist steering. Pump not included; must use an original pump or #5 above.

Major Advantage: Requires least amount of modification and looks close to original.

A custom Tri-Five Chevy really looks great "dropped in the weeds"! The only problem is when you use lowering springs or dropped spindles on your 1955, 1956 or 1957 Chevrolet Bel Air, 150, 210, Nomad or wagon you can scrape the frame or wheel wells trying to go over speed bumps or low street gutters when you are driving or turn into a car show. Eckler's Classic Chevy brings you this air bag suspension kit that allows you to lower your Tri-Five 3" lower than stock height and raise it back up a the flip of a few switches

## Upgrade Chassis, Art Morrison

- Allows Mounting Of Stock Body On A Modern Chassis
- Fitted For Rack And Pinion Steering
- Crossmember Allows For Use Of Any Transmission
- Fitted For 4-Link Rear Suspension
- Allows Use Of Up To 11-11/2" Rear Tires
- Greatly Improves Handling

This all new 2"x4" rectangular tube steel frame will give your classic the handling characteristics of a contemporary performance vehicle. The front suspension construction is similar to a C5 Corvette. The four-link rear end uses a super strong 9" Ford. There are dozens of upgrades and options so you can custom build the best possible chassis to fit your needs. For more information, call your CCI sales representative. The bare frame does not include any suspension components.

## Complete Air Ride Street Challenge Kits

- Complete Front And Rear Air Suspension Kit With Compressor And Ride Control

*Front kit includes: StrongArm tubular upper and lower control arms, bushings And ball joints included, lowers include integral anti-sway bar tab, ShockWave double-adjustable shocks, durable Firestone air bags, requires only minor frame trimming, front MuscleBar anti-sway bar.*

*Rear kit includes: Fully triangulated bolt-on 4-link suspension, pre-engineered mounting brackets and geometry for easy installation and set-up, ShockWave double-adjustable shocks, durable Firestone air springs.*

Not only do you gain full adjustability of the front and rear suspension height and performance, you also gain the advantage of a much improved ride via the Firestone air springs included in the kits. The unique double-adjustable shock absorbers on all four corners allow you to set the ride quality from extra firm all the way to soft. Double adjustable shocks allow you to set the amount of dampening on both the up and down stroke of the shock which is necessary for fine tuning the suspension for drag racing or serious street cornering. Up front, StrongArm super-strong tubular upper and lower control arms have been engineered specifically for use with the ShockWave shocks in these kits. They are designed to eliminate the troubles often experienced when using Air Ride suspension on stock control arm cars including ball joint binding and frame clearance issues. In addition, body roll is controlled with a MuscleBar front anti-sway bar. In the rear, the kits completely replaces the stock rear leaf spring suspension and upgrades it to a fully triangulated bar-type 4-link rear that simply bolts to the stock rear frame rails. The only welding required is attaching the new suspension brackets to the rear end housing.

## Grommet Sets

Nearly all of the grommets, bumpers, and plugs are now available for Classic Chevys. These items are available either in kit form or sold separately.

The purchase of a firewall forward and a body grommet set will cover most all of the grommets, bumpers, and plugs required except glass, steering and accessories grommets. The following is a breakdown of the contents of those kits. If you need other grommets, bumpers, plugs, drain tubes, or seals that are not contained in these kits, they must be purchased separately.

## 100 Years Of Chevrolet Book

This detailed book by Harold Louisiana guides you step by step through the restoration of the 1955-1957 Classic Chevy cars with more than 1800 detailed photographs. It's a hands-on, practical approach with real-life tips. The authors wrote each step so that it's clear enough for someone who has never restored a Chevy before. You'll see detailed steps from beginning to end. Learn what to take apart or put together, what bolts or fasteners are involved, and what wrenches to use. Each section is easy to read and to follow with its adjoining picture right below or nearby. Each section is numbered by steps, with corresponding numbers on the pictures.

## Lokar Drive-By-Wire Electronic Control Module With Harness, Billet Aluminum

These Lokar drive-by-wire electronic throttle controls are pre-programmed at the factory for specific applications. They include an application-specific pedal wiring harness that works in conjunction with the OEM wiring harness. The Billet Drive by Wire Pedal also has built in hysteresis (a delaying effect) to provide improved operator control and pedal stability over rough terrain. The electronic throttle controls are designed for use with Lokar's drive-by-wire pedal sets, sold separately, see Eckler's Part Number 57-384850-1. All Lokar products are made in the USA and carry a lifetime warranty.
